

BEST INDICATOR ADAPTIVE FORECASTING METHOD

ABSTRACT OF THE DISCLOSURE

5 A Best Indicator Adaptive (BIA) method fuses several singular
indicators into one composite model to provide a new forecasting combination
scheme. BIA uses the sizes of the spread of the distribution taking into
account the variation of the distribution parameters themselves. Underlying
the BIA method is the common theme and unifying theory of the power of
quotient and the methods of making use of order composition and sales
10 opportunities pipeline progression.
